

Summary of the progress

Working Group 2: Tree products

Krakow, 21st of February 2014

The identification of the tree products was started in Lisbon meeting and we will continue in identification. We have three country reports from Greece, Germany and Netherlands. Other countries will work on their reports. We discussed topics of plenary session and gave recommendations for book title and database structure.

Next steps

The above mentioned country reports will be completed and finished to the end of June. List of products will be completed with the contribution of all countries. The target products will be selected.
